DETAILED ACTION

Status of the Claims

Claims 1-37 are currently pending.

1. Applicant's election without traverse of Group I, claims 1-9, drawn to a method of making compound of formula (VIII) where $X = CH_2$, $n = 1$ and R_2 , R_3 , R_4 and R_5 are independently hydrogen or aliphatic, in the reply filed on 10/20/08 is acknowledged.

The following elected species is also acknowledged:

Subject matter not encompassed by elected Group I are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to non-elected inventions there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 10/20/08.

Priority

The current application is a 371 of PCT/EP03/10416 filed on 09/18/2003, which claims priority of application 60/411,920 (09/19/2002) and 60/480,242 (06/20/03).

Note

The examiner changed the title of the invention to a more descriptive title.

The process elected by the Applicant is free of the art.

Pursuant to Applicant's response, claims 1-37 are pending, claims 10-37 are withdrawn, and claims 1-9 are treated on the merits in this action. This is the first Office Action on the merits of the claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In the instant case, claim 1 discloses the variables R is alkyl and G is -OH or O M, wherein M is a metal or an ammonium moiety. R, G and M variables are currently not part of the claimed invention and one of ordinary skill in the art would not know what they represent.
3. Claims 5-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 5-6 are dependent on claim 2. Claim 5 recites the limitation "wherein R₇ is hydrogen and R₈ is fluoro". Claim 6 recites the limitation "wherein R₇ is alkyl and R₈ is hydrogen". There is insufficient antecedent basis for this limitation in the claims because claim 2 does not contain such variables.

Claim Objections

Claims 2-4 and 7-9 are objected to as been dependent upon rejected claims.

Conclusion

No claims are allowable.
